

ROCKSLIDE

KESSEL VALLEY ART DIRECTION

A miniature alpine world, built from chunky faceted primitives and flat palette colour, lit like a clear winter morning: warm sun, blue shade, snow that holds the light.

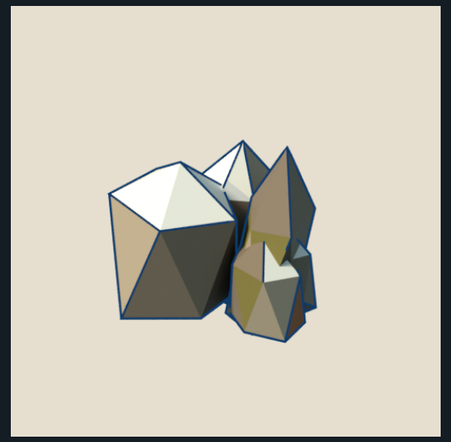

Rock is granite in the same tone as the ground rock, weathered into upright tors; snow sits only on the ledges. Patrol equipment is red with a white cross, so anything that can help you reads at a glance. Pole orange marks the way. The interface is slate instrument housing over paper maps.

Every 3D piece is built in GITCRAFT MeshCraft from art/3d/scripts/kessel_kit.py with these palette roles, baked to vertex colour so the game shades it with its own light.

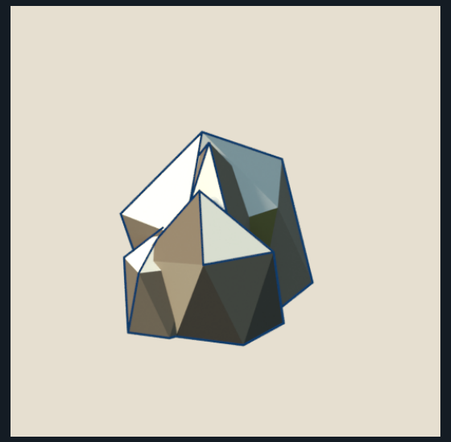

Kessel Snow	Snow Shade	Glacier Blue	Granite
Granite Dark	Granite Light	Lichen	Rust Stain
Spruce	Spruce Deep	Log	Log Dark
Log Light	End Grain	Patrol Red	Patrol Red Deep
Cross White	Pole Orange	Caution Amber	Lamp Glow
Steel	Steel Dark	Slate Ink	Slate
Nav Cyan	Paper
